Save failure

Version 2.0. FICTIONAL DEMONSTRATION MATERIAL.

If saving a draft fails, the current draft remains available in the editor.
Record the displayed error code and contact the fictional support owner.
This guide does not establish automatic retry, network recovery or offline persistence.

REPORT_LOCKED
A supervisor review is already open. Inspect the current report status.
Do not invent a recovery command or retry interval.

Authentication and evidence gaps

Version 2.0. FICTIONAL DEMONSTRATION MATERIAL.

AUTH_REQUIRED
The API request did not include a valid workspace token.
The API Reference describes the required Authorization header.
This collection does not specify token rotation or recovery-code regeneration.

Unknown error codes
For an unlisted code, ask the documentation owner. The available sample does not establish a definitive cause or corrective procedure.
